### FLEXIBLE TEAMING

AVision's core network is based in Syracuse NY, Melbourne and Fort Myers FL, New York City, San Antonio and Austin TX, San Francisco CA, Los Angeles, and the Washington DC metro area. We draw upon a network of experts from around the country and the globe to appropriately serve our clients.

*It allows us to be nimble and maintain low overhead —  
a benefit we pass on to our clients' budgets.*

# Forward thinkers need forward solutions.

## The essence of a successful

intelligence program is a solid understanding of use and capabilities of technological processes and tools available to leverage systems. There are categories of technological processes and tools that are required (e.g. applications, databases, networks, and reporting) that can be configured differently according to organizational and situational need – and, the processes, tools and rules can be concretely defined.

*Decision support at every level of the organization.*

### INTELLIGENCE SYSTEMS

AVIsion offers point solutions, COTS implementations, and design of comprehensive platforms to provide integrated, scalable frameworks for identifying and collecting data, and then converting that data into relevant, usable and timely intelligence. An end-to-end platform includes collection of business processes that an organization uses to understand its operations and adjust accordingly to improve the results. Elements of a BI system for data integration, intelligent storage, query, reporting, and advanced analytics may be present and can be leveraged, but the selection of the relevant tools is paramount to success.

### REPORTING & ANALYTICS

Reporting summaries are common projects in the AVIsion portfolio. We also specialize in analytics services, in which data is examined for trends and patterns. Forecasting and predictive modeling is another area of expertise. Advanced analytics such as extensive ad-hoc analysis with the addition of variables and conditions outside of traditional reporting are employed. Trends and patterns emerging on a consistent basis (key indicators) or that can be duplicated, can be abstracted into models to compare against new data sets. Transform raw data into useful material, and disseminate information throughout the enterprise—collect results from decisions to improve future outcomes.

### BEHAVIOR & ACTIVITY

The AVIsion group specializes in moving data through disparate systems and processes to add value to the tasks of staff and decisions of executives alike. Behavioral analysis and decision mapping can be utilized for training programs, marketing and purchasing studies, recruitment, lending practices, etc. Behavioral analyses can also determine effectiveness of systems and processes for use in any number of applications.

### OUR COMPETENCIES

We are business executives, academics, and engineers who have success in our fields:

DATA MINING & VISUALIZATION

ETL, ESB, EAI, BAM

DASHBOARDS

RISK MANAGEMENT

ALTERNATE PATH ANALYSIS

ANALYTICS

PERFORMANCE METRICS

ECONOMICS

EMERGING TECHNOLOGIES

PROJECT MANAGEMENT

BUSINESS PROCESS IMPROVEMENT

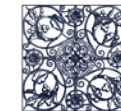

CHANGE MANAGEMENT

DECISION SUPPORT SYSTEMS

ENTERPRISE ARCHITECTURE

SOFTWARE DESIGN & DEVELOPMENT

INDEPENDENT VERIFICATION & VALIDATION
